

SCORE

Sustaining Competitive and Responsible Enterprises - India

International
Labour
Office

WHY

To sustainably integrate and compete in the global supply chain by reducing defects, operational cost, product price, waste and environmental footprints, improved workplace relations, occupational safety and health (OSH) and ability to respond to cyclical market shocks.

A global productivity and market competitiveness enhancement tool, developed by ILO, based on systematic establishment and application of modern management systems and good workplace practices.

WHAT

WHO

Designed for manufacturing units with 30-300 employees size-whether recent start-ups, established manufacturers struggling to maintain market share or dynamic firms with big ambitions.

Comprises of 5 modules, each module delivered using a combination of class-room and on-site shop-floor coaching services by ILO trained and certified SCORE trainers (Timeline : 2.5 -3 months per module)

HOW

FOR

National and multinational corporate entities aiming at improving their supply chain or industry associations looking for improving cluster competitiveness or manufacturing units (with 30 - 300 employees)

MR. ANOOP JAIN
Managing Director, Matrix Tools and Components Ltd, Faridabad

“SCORE has enabled us to look into our processes and wastages to minimise the input costs and maximise output while being responsible towards the environment, thus increasing overall productivity and profitability.”

MR. PRASANNA MUTHA
Owner
Tej Industries, Ahmednagar

“SCORE program has taught us how to identify the opportunities for improvement and how to achieve improvements. Today my employees on their own are switching of machines and lights after their work. I can see the pride in the face of my employees as they speak on how they have taken steps to save money for the company. I feel happy and encouraged to see how my employees are actively participating in problem solving.”
